Hiring manager,  
Finally Founding.

Dear hiring manager,

I am Dami Adegbelemile, a full stack developer with 5 years' experience. I've worked with several cross-functional teams across the globe to build and maintain high performance and scalable web applications. I recently worked as Lead Full-Stack Developer for a startup based in Dubai, UAE, where I spearheaded the development of both frontend and backend codebases. I built it using Typescript and Next.js on the frontend and NestJS, Prisma and Postgres on the backend.

You can see a prototype here: [PayDinner web app](#)

Generally, I utilize Typescript, React, Next.js, React Query, Zustand, NestJS, Prisma, AWS S3 and PostgreSQL database to build applications for my clients. I am also skilled in setting up CI/CD pipelines to streamline development processes.

If I skills align with what you're looking for, please reach out.

Cheers,  
Dami Adegbelemile.
